Omega 9 12%

Vitamins A1,B1,B2,B3,B6,C,D & E
Good amounts of Calcium, copper, iodine,
magnesium, Potassium, Phosphorous,
Chlorophyll and Fibre.

Why Organic Hemp Seed Oil ?

Hemp is one of the most valuable plants to human survival. Humans have utilized hemp for more than 10,000 years.

Most people remember hemp as a plant that supplied the earth with high quality fibre material but have forgotten the many health benefits the oil has to offer.

Hemp Seed Oil is well known for its health benefits worldwide in relation to evening out blood pressure, reducing high cholesterol, all types of Neurodermatitis including Psoriasis Eczema and Dermatis. Rheumatic sufferers have found much relief with scientific trials proving its effectiveness once again.

New studies are supporting old knowledge showing people with Multiple Sclerosis, Schizophrenic Psychosis and Cancer all have lower levels of GLA in their blood. Hemp has the perfect levels of GLA. Studies continue to indicate that Cold Pressed Hemp Seed Oil is a major preventative to these diseases because of its very high levels of GLA and the near perfect levels of Omega 3, Omega 6 and Omega 9 for the human body.

The best ratio according to Doctors including Dr Erasmus author of the research into fats and oils and later in his book entitled "Fats that kill Fats that heal" along with Dr Andrew Well's research show a ratio of 4 Omega 6 to 1 Omega 3 is the closest to that stored in human fat tissues.

It is this balance that makes hemp seed oil easily and readily available to the body, thus its use makes for very high potency in the body.

The best part about Organic Hemp Seed Oil is that all the vitamins and minerals are absorbed through the skin. The oil contains absolutely no cholesterol. These vitamins include A1,B1,B2,B3,B6,C,D & E. The Oil is also an excellent source of Zinc Calcium Potassium, Magnesium, Iron, Phosphorous, Fibre and Chlorophyll. Hemp Seed Oil is a truly natural multi-vitamin which is excellent for the circulation system.

Cardiovascular Disease

Most of the cardiovascular diseases threatening the health of people are caused by the formation of arterial plaque i.e. the deposition of blood components on the interior walls of our blood vessels. This process may eventually block blood flow and cause arteriosclerosis and strokes. LDL cholesterol a sticky substance present in the blood has been identified as one of the main contributors to arterial plaque formation. Among other factors, such as smoking and stress, the intake of the saturated fatty acids present in animal fat is known to contribute to high LDL levels in the blood.

Reversibly, dietary treatment of patients with daily doses of linoleic acid and GLA has shown to rapidly decrease elevated blood levels of both LDL cholesterol and total cholesterol, thus the regular intake of Pure Cold Pressed Hemp Seed Oil will help reduce the risk of arterial sclerosis and other cardiovascular diseases.

The daily recommended dose is 10ml. In Australia you need to massage at least this amount into the less hairy parts of the body.

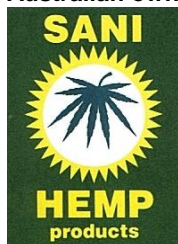

Neurodermatitis, Psoriasis, Eczema, Dermatitis

People suffer from different degrees of agonizing itching, especially at night. The skin feels very dry and the activity of perspiratory and sebaceous glands is low. Neurodermatitis as is Psoriasis is characterized by a high water loss through the skin. Deficiencies in Essential Fatty Acids (EFA)'s can be the main causes. These EFA's have a strong influence on the barrier function of the skin, because they regulate water loss through the epidermis. Neurodermatitis sufferers show a deficiency of EFA's which affects the whole body. It has now been shown that inhibition of enzymatic transformation of Linoleic Acid leads to GLA deficiency and subsequently to Prostaglandin deficiency. Sani Hemp Pure Cold Pressed Hemp Seed Oil due to its high content in both Linoleic and Gamma Linoleic Acid can assist in the treatment of these conditions.

Organic Hemp Seed Oil is also featured as a major ingredient in a wide variety of products. These include the **Richmond Nature Range** of body and baby care lines, soaps and conditioners. We also make Australian products under the **Sani Hemp** name. Please visit our web site for a full listing of all products available.

CONSUMPTION OF HEMP SEED OIL IN AUSTRALIA IS ILLEGAL. Consuming this oil in most countries is legal. Please refer to your government laws regarding this matter. In Australia rub the oil into the less hairy parts of the body for best results.

Trace elements of THC may be present in this oil, these levels are below federal government regulations.

HEATING THIS OIL IS NOT RECOMMENDED

Your local stockist is :

The daily massaging of the area improved skin condition over a 12 week period with 20ml of Pure Hemp Seed Oil.

Eczema on the other hand is a drying of the skin. Hemp Seed Oil is an excellent moisturiser assists in the re-moisturising of the affected areas while revitalizing the skin.

Hemp Seed Oil applied directly to the affected skin stimulates blood flow to the area, helps to remove toxins by oxidation. Apply as required. Patchouli oil may be added for greater synergistic affect.

Sexual Performance, PMS and Libido

Premenstrual Syndrome may include varying intensities of painful muscular tension, swelling of the breasts, nervousity, irritability as well as aggressive and depressive tendencies. Investigations show that women with PMS suffer from a Fatty Acid metabolism disorder. The ability to convert Linoleic Acid into Gamma Linoleic Acid (GLA) and subsequently into Prostaglandins is disturbed.

Clinical trials showed a significant improvement in PMS related symptoms over a 12 week period. The daily recommended dose is 5ml, massaged into the stomach area.

Desire and healthy blood circulation are certainly major factors to a good sex life. The many vitamins and minerals found in Pure Cold Pressed Hemp Seed Oil will supply you with much needed stamina as well as zinc which is a key element for men. Pure Cold Pressed Hemp Seed Oil is well known for aiding with blood circulation to the extremities of the body making it a great boost for bedroom activities. A healthy blood circulation plays an extremely important role in arousing both men and women.

Try adding a few drops of your favourite essential oil and use it as a massage oil.

Essential oils assist in relaxation and consequently performance. A daily dose of between 5 and 10ml rubbed into the less hairy parts of the body is

recommended. Hair absorbs the oil and does not allow it to be absorbed into the body.

Rheumatoid Arthritis

Gamma Linoleic Acid (GLA) is an effective anti-inflammatory and immune system stimulators. 40ml of Pure Cold Pressed Hemp Seed Oil a day over a period of 12 weeks has been clinically proven to significantly alleviate the symptoms of Rheumatoid Arthritis.

Cancer, Multiple Sclerosis, Schizophrenic Psychosis

A number of clinical studies strongly suggest administration of GLA as a preventative measure and treatment for these diseases. Cancer treatment may be assisted by administration of Linoleic Acid and GLA. Cancer tissue and cells have lower contents of GLA and other related metabolites compared to healthy tissue. Linoleic Acid enhances the die-off of cancer cells -the use of Essential Fatty Acid might therefore prove to have positive effects.

Multiple sclerosis for example occurs more frequently in geographical regions where a diet includes high amounts of saturated fats. Dietary supplementation of unsaturated fatty acids has a positive effect on the course of the disease.

In sufferers of Schizophrenic Psychosis disturbance are found in the fatty acid metabolism which may be treated through the administration of essential fatty acids. Sani Hemp Organic Virgin Hemp Seed Oil has ideal characteristics to assist with these requirements.
